The VSG Team will be at **Porto Conte Ricerche** on **October 3<sup>rd</sup>, 2012** to introduce you to VSG visualization and image analysis software solutions.

Avizo and Amira are powerful, multifaceted tools used for visualizing, exploring and analyzing scientific and engineering data. They help engineers, scientists and researchers gain greater and faster insight into 2D/3D images and numerical simulation data.

### Applications

- Materials Research
- Food industry
- Medical, Biomedical and Life Sciences
- Engineering & simulation
- Industrial Inspection
- Oil & Gas, Geoscience, Mining

### When:

**Wednesday, October 3<sup>rd</sup>, 2012, 10.30 AM.**

### Where:

**Porto Conte Ricerche Srl - Loc. Tramariglio - Sala Nettuno**

### Highlights:

- Processing and segmentation of data from Computed Tomography, Micro-CT, MRI, Microscopy, FIB-SEM, etc.
- 3D model reconstruction
- Advanced measurement and quantification
- Porous and multiphase media analysis
- 3D image-based meshing for CFD and FEA
- Simulation pre- and post-processing tools

Before and after the 30-minute presentation, attendees will have the opportunity to ask questions and see live demonstrations on different types of materials.

One-on-one meetings with individuals and groups will be set-up on a first-come, first-served basis.

To schedule a meeting and/or participate in the presentation, please contact Davy Penhard at [davy.penhard@vsg3d.com](mailto:davy.penhard@vsg3d.com).

If you have colleagues who you think may be interested in seeing this presentation, please forward this invitation to them.
